# TURNAROUND TIMES YOU CAN TRUST

We offer a range of turnaround times to meet your needs and the clinical needs of your case. You can select how quickly your radiology report is back with you from the following options:

REPORTING OPTIONS				
VET.CT SERVICE	OPTION 1	OPTION 2	OPTION 3	OPTION 4
Radiographic	Within 1 hour	Within 4 hours	1-2 Business Days	2-4 Business Days
CT	Within 4 hours	Within 24 hours	1-2 Business Days	2-4 Business Days
MRI	Within 4 hours	Within 12 hours	1 Business Day	2 Business Days

The table above shows the maximum time you can expect to receive your report after submitting a case to us. However, our team works incredibly hard to provide your report back as quickly as possible, often well before the deadline.

For instance, over the past 7 days, our average actual reporting times in North America for Option 1 were:

<b>X-ray</b> 35m	<b>CT</b> 1h 36m	<b>MRI</b> 42m
---------------------	---------------------	-------------------

Average actual data displayed is taken from 17 October 2024 and reflects information available during the 7 days leading up to this date.

# ADDED VALUE SERVICES

**Improve your CT decision-making**

Watch these short videos to understand more about Computed Tomography and how you can best make use of this imaging modality in your patient work-ups.

**X-PERT Radiation Safety Center**

Access VET.CT's best practice guides and downloadable toolkit to keep your practice, people and patients safe.
